

Zone Architectural Products proudly bring you the FireZone™ range of products for New Zealand. We combine expert technical advice with a preferred installer network to bring the construction industry a range of fire-rated coatings you can specify with confidence.

APPLICATIONS:

- **Interior surfaces:** Ceiling linings and interior panelling where greater than a Group 3 fire rating is required
- Pinus Radiata substrate
- FSC Certified
- Clear natural finish, not compatible with other surface treatments such as oil or water-based stains
- Timber can be cut on-site and assembled in place
- Dimensions: 1200mm x 2400mm width / length
- Thickness: 12mm
- Density² - average 500kg/m³

FIREZONE™ PLYWOOD

Natural Timber Plywood fire rated to a Group 1S for interior ceiling linings, interior panelling, education, office & shop fit-outs
